Project Overview

Better Health Together Project - Health Systems Strengthening

Community Partners International (CPI) is leading the Better Health Together project to implement the Health Systems Strengthening (HSS) component of the Access to Health Fund in Kayah, Kayin, Mon and Southern Shan States in Myanmar. CPI is working closely with ethnic and community-based health organizations (ECBHOs) in these areas through the Ethnic Health System Strengthening Group (EHSSG) to strengthen the health system and capacity, and increase access to quality health care services for conflict-affected, hard-to-reach and under-served communities. CPI's role is to provide technical assistance and fund management, and to support coordination and collaboration between the Myanmar Ministry of Health and Sports (MoHS) and EHSSG.

At a Glance

Donor(s):

Access to Health Fund

Project Duration:

March 2019 - December 2022

Geographic Coverage:

Kayah, Kayin, Mon and Southern Shan States

Population Coverage:

N/A
